

# Spring Activity Week 28<sup>th</sup> of April – 2<sup>nd</sup> of May

UKRI AI Centre for Doctoral Training in Sustainable Understandable agri-food  
Systems Transformed by Artificial Intelligence (SUSTAIN)

UK Research  
and Innovation

UNIVERSITY OF  
LINCOLN

1495  
UNIVERSITY OF  
ABERDEEN

QUEEN'S  
UNIVERSITY  
BELFAST

University of  
**Strathclyde**  
Glasgow

# Objectives

1. Reinforce Computation Training for earlier Activity Weeks
2. Build Collaboration within Cohort (Group Activities)
3. Data Management Plan Training

# Activity Week Schedule

	Mon	Tue	Wed	Thur	Fri
09:00 - 09:30		Focus Time: Hackathon	Focus Time: Hackathon	Focus Time: Hackathon	Focus Time: Hackathon
09:30 - 10:00					
10:00 - 10:30	Welcome & Hackathon	Hackathon	Student Presentations	Hackathon	Hackathon
10:30 - 11:00		Drop-In Clinic		Drop-In Clinic	Conclusion (1
11:00 - 11:30		Focus Time: Hackathon		Focus Time: Hackathon	DMP QA
11:30 - 12:00					
12:00 - 12:30	Lunch	Lunch	Lunch	Lunch	Lunch
12:30 - 13:00					
13:00 - 13:30	Hackathon - Group Acitivty	DMP Training	Student Presentations	DMP Task	
13:30 - 14:00					
14:00 - 14:30					
14:30 - 15:00					
15:00 - 15:30					
15:30 - 16:00

# Rice Seeds

- *Vietnam is the world's 3rd largest producer of rice - Annual exports of \$2.95 billion from 6.61 million tonnes in 2013.*

*Verification Centres inspect rice seed to confirm varietal identity to ensure consistency, quality assurance, improve disease and pest management and comply with export standards*

# Conventional Inspection

- Manual, labour intensive process
- 1,000's of species
- Limited sampling; 200 seeds per bag

# Dataset

- 8,640 rice seed kernels: 90 rice seed species and 96 kernels per
- Imaging systems:
  - Visible - Near Infrared (VIS/NIR) Hyperspectral Imaging Device System (~385nm - ~1000nm) consisting of a Specim V10E Imaging Spectrograph and Hamamatsu ORCA-05G CCD camera.
  - RGB - Fujifilm X-M1 with a 35mm/F2.0, ISO 400.

# Automatic Inspection (Computer Vision)

# Spectrum

**Figure 2-1.** High-energy visible (HEV) blue light ranges from 380 to 500 nm. The blue light rays that border UV (at 380 nm) have the highest energy.

HOW TO SAVE YOUR EYES IN THE DIGITAL AGE ©Healthe 2019 [eyesafe.com/handbook](https://eyesafe.com/handbook)

# RGB

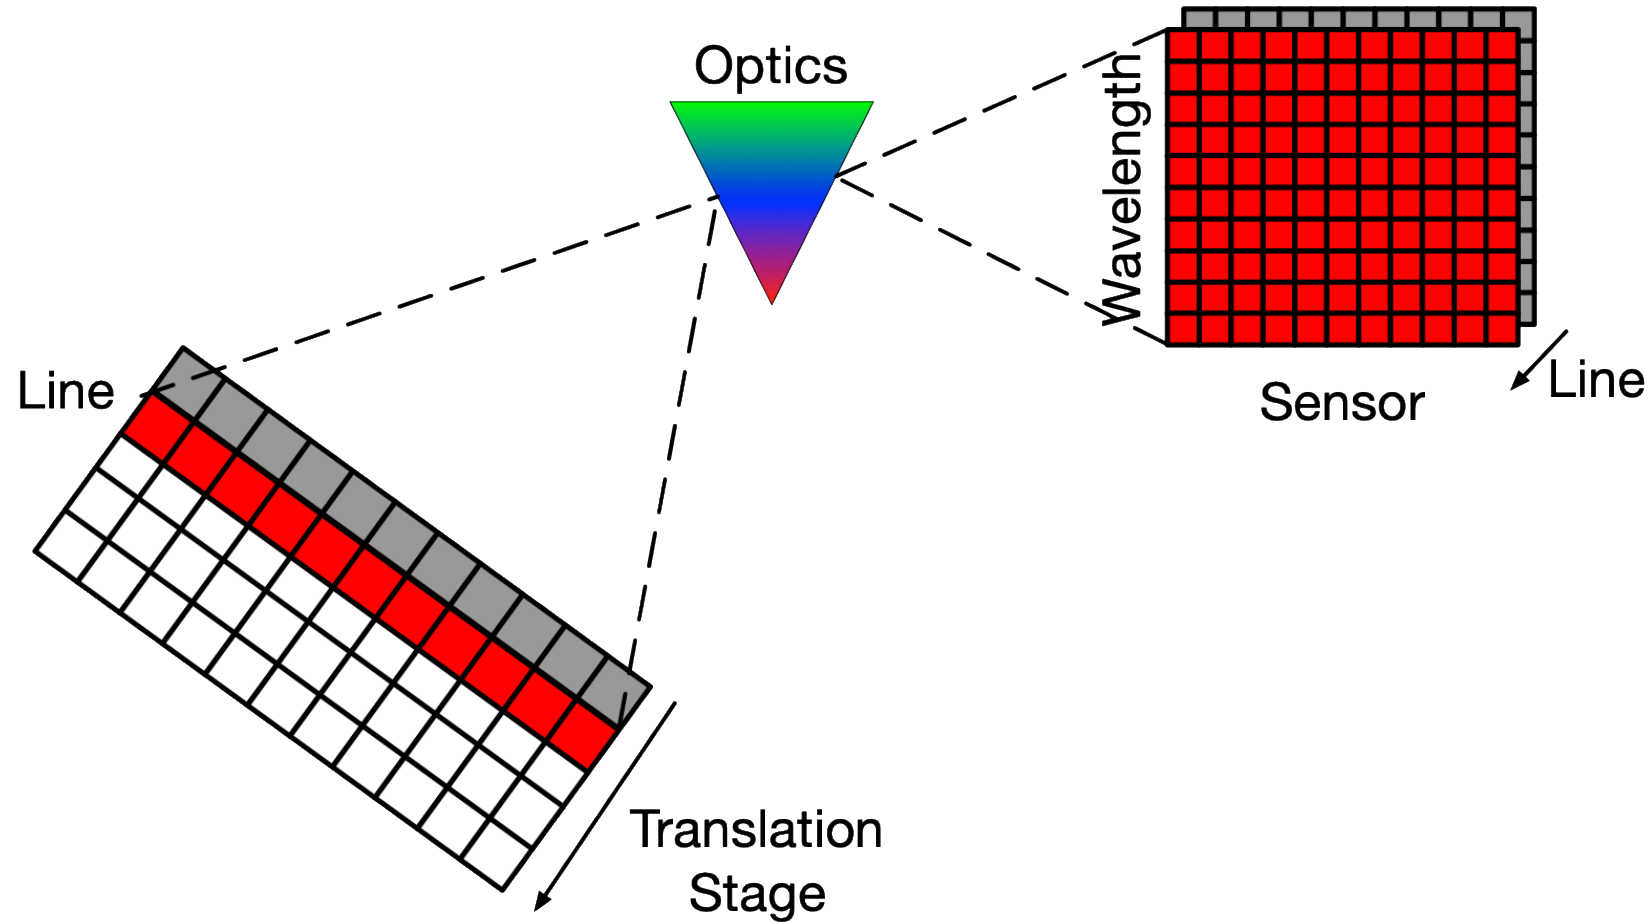

# RGB vs HSI

# Push Broom Camera

# Automatic Inspection

# HSI Calibration

- Imbalanced illumination
- Correct sensor effects

# HSI Calibration

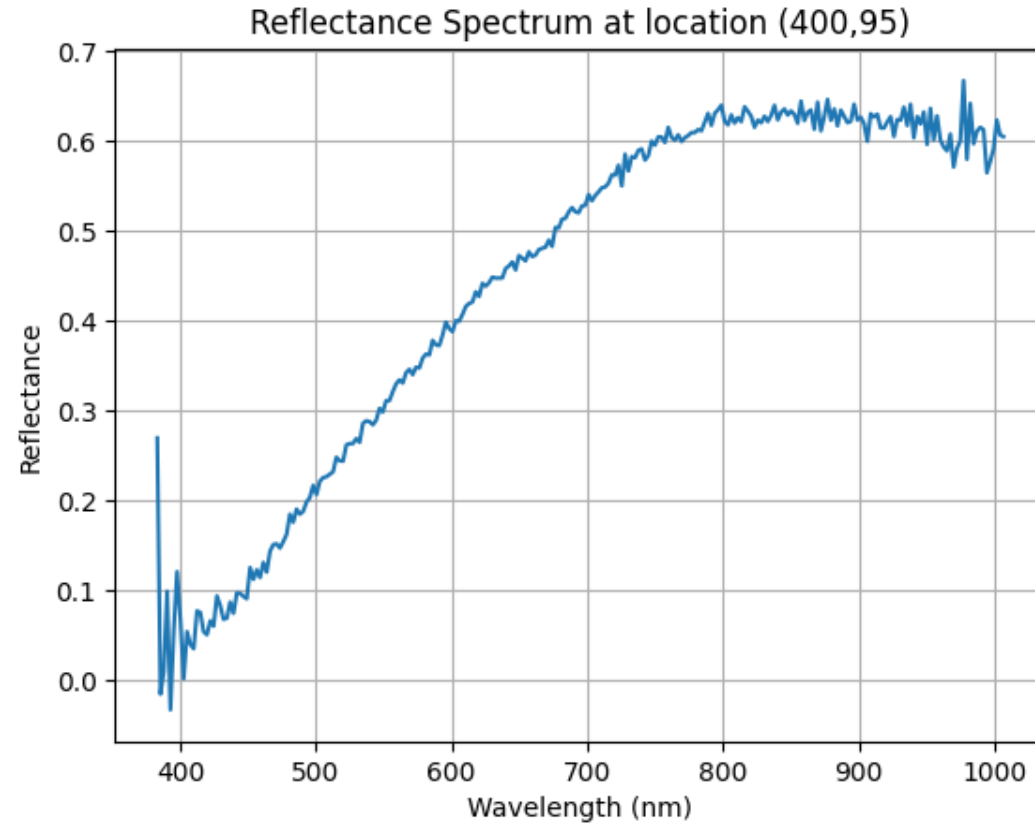

$$I_{\text{norm}} = \frac{I - I_{\text{dark}}}{I_{\text{white}} - I_{\text{dark}}}$$

100% reflective  
Spectralon tile

Lens cap applied  
for black

# Teams

## Team A:

- Aura
- Lauren
- Alisa
- Jack

## Team B:

- Athinoulla
- Dominik
- James
- Villanelle

**Could you please come up with a name for your team?**

# Objectives

- Explore the Dataset: Investigate the hyperspectral data to identify interesting patterns
- Develop a Model: Create an innovative approach to analyze or classify the rice seed varieties
- Visualize Results: Generate some visualizations that demonstrate your findings
- Prepare a Presentation: Document your methodology and results for Friday's presentation

# Submission Requirements

- Code Repository: Well-documented code for your analysis and models
- Results Summary: Key findings and visualizations
- Presentation: A 15-minute presentation explaining your approach and discoveries
- Technical Documentation: Methods, challenges, and potential applications

# Evaluation Criteria

- Innovation: Originality of approach and techniques
- Technical Merit: Effectiveness and sophistication of models/algorithms
- Insights: Quality and relevance of discoveries from the data
- Presentation: Clarity and engagement of the final presentation

# Good Luck
